

INTERNATIONAL APPLICATION PUBLISHED UNDER THE PATENT COOPERATION TREATY (PCT)

(51) International Patent Classification ⁷ : H04B 1/707, H04L 25/02		A3	(11) International Publication Number: WO 00/21201
			(43) International Publication Date: 13 April 2000 (13.04.00)
(21) International Application Number: PCT/US99/22437		(81) Designated States: AE, AL, AM, AT, AU, AZ, BA, BB, BG, BR, BY, CA, CH, CN, CU, CZ, DE, DK, EE, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MD, MG, MK, MN, MW, MX, NO, NZ, PL, PT, RO, RU, SD, SE, SG, SI, SK, SL, TJ, TM, TR, TT, UA, UG, UZ, VN, YU, ZA, ZW, ARIPO patent (GH, GM, KE, LS, MW, SD, SL, SZ, TZ, UG, ZW), Eurasian patent (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European patent (AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE), OAPI patent (BF, BJ, CF, CG, CI, CM, GA, GN, GW, ML, MR, NE, SN, TD, TG).	
(22) International Filing Date: 28 September 1999 (28.09.99)			
(30) Priority Data: 09/168,233 7 October 1998 (07.10.98) US			
(71) Applicant: ERICSSON INC. [US/US]; P.O. Box 13969, 7001 Development Drive, Research Triangle Park, NC 27709 (US).		Published With international search report.	
(72) Inventors: SOUROUR, Essam; 1305 Seabrook Avenue, Cary, NC 27511 (US). BOTTOMLEY, Gregory, E.; 100 Merlot Court, Cary, NC 27511 (US). RAMESH, Rajaram; 403 Danton Drive, Cary, NC 27511 (US).		(88) Date of publication of the international search report: 31 August 2000 (31.08.00)	
(74) Agent: MONCO, Dean, A.; Wood, Phillips, VanSanten, Clark & Mortimer, Suite 3800, 500 West Madison Street, Chicago, IL 60661-2511 (US).			

(54) Title: DELAY SEARCHER AND DELAY TRACKERS INTERACTION FOR NEW DELAYS ASSIGNMENT TO RAKE FINGERS

(57) Abstract

A direct sequence spread spectrum receiver for operating in a multipath fading channel comprises a rake receiver having plural rake fingers. Each rake finger demodulates a received signal from one of plural channel paths. The output of the plural rake fingers are combined. Each rake finger utilizes a select assigned delay to synchronize to a delay of the one channel path. A searcher periodically performs a channel search on the received signal to detect new delays of strongest paths in the channel. Plural trackers, one for each channel path, adjust the select assigned delays between searches performed by the searcher. A delay controller is operatively coupled to the searcher and the tracker. The delay controller compares new delays of the strongest paths from the searcher to the select assigned delays and reassigns one of the select assigned delays with one of the new delays only if the new delay differs from the one select assigned delay more than a preselect minimum amount.

INTERNATIONAL SEARCH REPORT

International Application No
PCT/US 99/22437

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 H04B1/707 H04L25/02

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 H04B H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
P, X	<p>EP 0 896 438 A (LUCENT TECHNOLOGIES INC) 10 February 1999 (1999-02-10)</p> <p>abstract column 2, line 21 - line 46 column 4, line 56 - column 5, line 23 column 8, line 2 - line 21; figure 5</p> <p style="text-align: center;">— -/-</p>	<p>1,2,5, 14,15, 17, 21-23, 29-32</p>

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

Date of the actual completion of the international search

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US 99/22437

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☒ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☒ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-8,21-28

A direct sequence spread spectrum receiver with RAKE demodulation, a searcher, trackers and a controller to detect whether or not the delays found by the searcher should be re-assigned to the ones tracked by the trackers. The controller further detects if one of the searcher delays differs from an already tracked delay more than a preselected minimum amount.

2. Claims: 9-13

A direct sequence spread spectrum receiver and method with RAKE demodulation, a searcher, trackers and a controller to detect whether or not the delays found by the searcher should be re-assigned to the ones tracked by the trackers. The controller further detects if each of the searcher delays differs from an already tracked delay more than a preselected minimum amount (which excludes the reassignment according to group 1).

3. Claims: 14-20,29-35

A direct sequence spread spectrum receiver with RAKE demodulation, a searcher, trackers and a controller to detect whether or not the delays found by the searcher should be re-assigned to the ones tracked by the trackers. The controller further re-assigns the delays already being tracked with the closest one of the delays found by the searcher.

4. Claims: 36-40

A method for initialising demodulation information of a channel path by making and using channel measurements or using storing automatic frequency control information from a set containing one or more paths and initialising demodulation information of a second set containing one or more paths using stored information from the first set of paths.
